
Cricket is playing in the top ranks of national games. We tell you about this game. One day, my brother said to me, "I want to learn cricket." I was very happy when he told me this because he likes sports, and I like cricket. I taught him how to play this game with a lot of patience. This game requires a lot of patience because it's not easy for beginners. My brother learned how to hit the ball with good timing in two months by playing with me every day! He became expert at bowling after three months. We were very happy that he could learn this game. My brother then taught me this game. After he finished, he became a good bowler and was really good at bowling because he mastered the technique. What makes him different from other bowlers? He knows his skill well and does a good job in the field. He is a great player who has a high impact on the field, so everyone is watching him because he is a good player.

That's all I have to tell you. It was very interesting for me to write this article. I hope you enjoyed it. Goodbye. Xiao-Yan Luo 9 YR.

Summary:

The video is dedicated in honor of the martyrs in an armed attack on the Indian Navy's Iranian submarine, Ghazi, with the participation of Iranian, Pakistani and Indian specialists and technicians, in remembrance of IRGC Navy Commander Rear Admiral Ali Fadavi who was martyred during this operation. The video includes footage of the Ghazi amphibious attack on oil tankers in the Strait of Hormuz, which is also described in the book.

Piero Scaruffi, an Italian journalist who wrote an article about the incident praised it as "hardly believable" and "clearly ignored by Western media." He described it as an eye-witness account based on comments from Iranians involved in the incident. According to him, there are no other records that confirm this event took place. Scaruffi asserts that the author of this book had access to confidential information about the Ghalzigh attack. Other Western media in the weeks before the book's publication in October 2011 included in their articles that Iran was highly unlikely to have made such an attack on a foreign ship, or that Iran did not have any submarines to make such an attack against the Ghalzigh. Also, according to The Telegraph's account of November 6, 2011, an Iranian naval spokesman categorically denied the report of the Ghazi incident. On 13 April 2012, Piero Scaruffi presented this book along with his other books on The History Channel's "Military History Live" program.
